

Personal System/2
Facts and Features

June 1991

PS/2 it!

Use this handy reference to make quick comparisons of IBM Personal System/2[®] models—and check their options, too. It presents basic facts and features—as well as attachment cards and enhancement products—for the entire PS/2[®] family.

⁴128KB of this memory is reserved for hardware system use on Models 55 SX, 55 LS, P70 386, 70 386.

⁵Achieving this configuration requires installation of non-IBM memory cards.

⁶IBM intends to provide connectivity to IBM networks using the L40 SX's external expansion port and Personal Computer AT versions of the 3278/3279 Emulation Adapter, the 5250 Emulation Adapter, and the Token-Ring Network 16/4 Adapter.

⁷Secures fixed disk only.

⁸DOS 5.0 is required to support the 2.88MB diskette drive and the media-sense features of the 1.44MB and 2.88MB drives.

⁹Second diskette drive and fixed disk are mutually exclusive.

¹⁰One full-size, one half-size; 8525-L01, L04 models use half-size slot for Token-Ring Adapter.

¹¹ Has an AT bus external expansion port instead.

¹² Two full-size; two half-size.

¹³ A future release of OS/2 LAN Server will provide OS/2 client support for remote program load in a Token-Ring Network.

¹⁴ OS/2 client support will be available in a future release of OS/2 LAN Server.
